

Cost-Saver Turbo Rebuild Package

This new program is designed to streamline the rebuild procedure for your basic Turbo-Meter to save you both time and money. Your used meters are rebuilt using genuine replacement parts. Meters included in the program: TPL-9, T-10, Mark II, AAT II Auto-Adjust Turbo-Meters and associated modules.

A total, quality refurbishment for one special price.

We waste no time in responding to you. Immediately upon receiving your meters we schedule a thorough base refurbishment. Our records show that this comprehensive service meets the needs for over 80% of the meters that we rebuild. You are advised promptly if a meter requires more extensive repairs beyond the scope of the plan.

- Disassemble, inspect and degrease all components
- Replace key components such as bearings and seals
- Apply new badges and paint
- Perform atmospheric calibration
- Custom package for return

Turbo refurbishment is performed by experienced **Sensus** technicians using quality parts, equipment and processes defined by a world leading manufacturer of turbine meters.

Should your meter require additional parts and service beyond the scope of the base refurbishment, you will be entitled to a special discount. In addition, as a program participant, you receive a 15% to 20% discount on atmospheric and high pressure in-tests, and on high pressure out-tests.

When you add up all the benefits of our Cost-Saver Turbo Rebuild Package – you'll quickly see that now is an opportune time to refurbish your old, worn Turbo-Meters.
